Its successive complexifications give rise to a hierarchy of components, called category-neurons (or, more briefly, cat-neurons), which model more and more complex mental objects, in a robust though flexible way. They form a memory evolutive system, called the memory evolutive neural system (MENS).

## **Studies in Multidisciplinarity | Memory Evolutive Systems**

Memory Evolutive Systems; Hierarchy, Emergence, Cognition provides comprehensive and comprehensible coverage of Memory Evolutive Systems (MEM). Written by the developers of the MEM, the book proposes a mathematical model for autonomous evolutionary systems based on the Category Theory of mathematics.
