Deinstitutionalisation and primary health care. Prior to 1997, mental health care in South Africa was mainly institutionalised, and little emphasis was placed on the development of curative therapies.

### **Mental health care in South Africa - Wikipedia**

Mental health, or psychological health, encompasses the well-being of mind, body and spirit and contributes to overall health and resilience. Throughout the military community, additional stressors placed on individuals and families adds to the importance of maintaining awareness of internal and external demands on health and of the many resources available to support psychological health.
