

### **metastable mechanically alloyed and pdf**

Among the various contributions are major papers covering the topics of bulk metallic glasses, GMR in mechanically alloyed materials, nanostructures via melt-spun precursors, mechanical grinding, mechanosynthesis and mechanochemistry. Progress in the area of sintering and compaction techniques is reported.

We report the first observation of reversible equilibrium crystalline $\leftrightarrow$ metastable crystalline phase transformation in mechanically alloyed Ni $\leftrightarrow$ Ge powder mixtures. The formation of the equilibrium NiGe and metastable NiGe 2 phases was investigated using x-ray diffraction and scanning electron microscopy methods.
