The miracle of the gulls is an 1848 event often credited by Latter-day Saints ("Mormons") for saving the Mormon pioneers' second harvest in the Salt Lake Valley. According to accounts, seagulls miraculously saved the 1848 crops by eating thousands of insects that were devouring their fields. The first crop was planted in 1847 just a few days after they entered the valley, which was very late in ...

Chemists have long recognized water as a substance having unusual and unique properties that one would not at first sight expect from a small molecule having the formula H_2O . It is generally agreed that the special properties of water stem from the tendency of its molecules to associate, forming short-lived and ever-changing polymeric units that are sometimes described as "clusters".
