The nuclear factor kappa B (NF- $\kappa$ B) family of transcription factors plays a central role in coordinating the expression of genes that control inflammation, immune responses, cell proliferation, and a variety of other biological processes.

From the molecular perspective, cisplatin represents a perfect example of how a small alteration in chemical structure can significantly affect biological activity in target cell (Goodsell, 2006). As illustrated in Fig. 2, cisplatin, carboplatin and oxaliplatin are composed of doubly charged platinum ion surrounded by four ligands, with the amine ligands on the left forming stronger ...

Molecular medicine is a broad field, where physical, chemical, biological, bioinformatics and medical techniques are used to describe molecular structures and mechanisms, identify fundamental molecular and genetic errors of disease, and to develop molecular interventions to correct them. The molecular medicine perspective emphasizes cellular and molecular phenomena and interventions rather ...

### **Molecular medicine - Wikipedia**

DNA repair is a collection of processes by which a cell identifies and corrects damage to the DNA molecules that encode its genome. In human cells, both normal metabolic activities and environmental factors such as radiation can cause DNA damage, resulting in as many as 1 million individual molecular lesions per cell per day. Many of these lesions cause structural damage to the DNA molecule ...

In mammals, paternal mitochondria are tightly packed into the midpiece, the structure connecting the head and flagellar tail of the sperm (Fig. 1a). In Chinese hamsters (*Cricetulus griseus*) that have unusually giant sperm, the sperm midpiece including the paternal mitochondria and the flagellar tail remain outside the egg and do not enter the oocyte cytoplasm after fertilization , .

1 2 CHAPTER 1 Cell Injury, Cell Death, and Adaptations responses are hypertrophy, hyperplasia, atrophy, and metaplasia. If the adaptive capability is exceeded or if the external stress is inherently harmful, cell injury develops (Fig. 1-1). Within certain limits injury is reversible, and cells return to a stable baseline; however, severe or per-
