Approaches. One can sub-divide approaches to the origin of language according to some underlying assumptions: "Continuity theories" built on the idea that language exhibits so much complexity that one cannot imagine it simply appearing from nothing in its final form; therefore it must have evolved from earlier pre-linguistic systems among our primate ancestors.

Dual-phase steels (DP steels) consist of ferrite and a dispersed hard martensitic second phase in the form of islands. Usually they are low-carbon low-alloy materials with 10-40 vol.% hard martensite or martensite-austenite particles embedded in a ductile ferrite matrix. As they combine high strength and good formability at low production costs they are widely used for automotive applications.

Eumetazoa (Greek: ἔμμετα [eu], well + ἄμα, ἴμα [metā], after + ἄζωον [zōon], animal) or Diploblasts, or Epitheliozoa, or Histozaa are a proposed basal animal clade as a sister group of the Porifera. The basal Eumetazoan clades are the Ctenophora and the ParaHoxozoa. Placozoa is now also seen as an Eumetazoan in the Parahoxozoa.. Several other extinct or obscure life forms, such as Lotuba ...

Organicâ€“inorganic perovskite solar cells have recently emerged at the forefront of photovoltaics research. Power conversion efficiencies have experienced an unprecedented increase to reported values exceeding 19% within just four years. With the focus mainly on efficiency, the aspect of stability has so far not been thoroughly addressed. In this paper, we identify thermal stability as a ...

2.Synthesis of morphological Cu<sub>2</sub>O crystals with different architectures 2.1.Basic strategies for synthesis of faceted Cu<sub>2</sub>O crystals. Faceted Cu<sub>2</sub>O micro-/nanocrystals can be prepared by many synthetic methods, including wet-chemistry route (such as liquid reduction, hydrothermal and solvothermal synthesis), electrodeposition, sputtering, and irradiation technique .
