

motion detection and tracking pdf

Motion detection is the process of detecting a change in the position of an object relative to its surroundings or a change in the surroundings relative to an object. Motion detection can be achieved by either mechanical or electronic methods. When motion detection is accomplished by natural organisms, it is called motion perception

Motion detection - Wikipedia

A 2-part series on motion detection. This is the first post in a two part series on building a motion detection and tracking system for home surveillance.. The remainder of this article will detail how to build a basic motion detection and tracking system for home surveillance using computer vision techniques.

Basic motion detection and tracking with Python and OpenCV

Face detection is a computer technology being used in a variety of applications that identifies human faces in digital images. Face detection also refers to the psychological process by which humans locate and attend to faces in a visual scene.
