Nanotechnology in Concrete Materials

The synthesis, characterization and processing of such NsM are part of an emerging and rapidly growing field referred to as nanotechnology. R&D in this field emphasizes scientific discoveries in generation of materials with controlled microstructural characteristics, research on their processing into bulk materials with engineered properties and technological functions, and introduction of new ...

In the next sections we will discuss the state of the art of anode materials for LIBs, with particular emphasis on the recent nanotechnology research outcomes and outstanding results.

Review on recent progress of nanostructured anode

Nanotechnology ("nanotech") is manipulation of matter on an atomic, molecular, and supramolecular scale. The earliest, widespread description of nanotechnology referred to the particular technological goal of precisely manipulating atoms and molecules for fabrication of macroscale products, also now referred to as molecular nanotechnology. A more generalized description of nanotechnology was ...

Welcome to NANO 2018. NANO Conference, spearheaded by International Committee on Nanostructured Materials (ICNM), has been acting as a traditional meeting place for most nanomaterials researchers, where the state-of-the-art research and latest advanced findings in the field are presented. A range of topics at the frontier of knowledge in the field of nanomaterials will be discussed and a wide ...

Advances in Materials (AM) publishes reviews, full-length papers, and short communications recording original research results on, or techniques for studying the relationship between structure, properties, and uses of materials. The subjects are seen from international and interdisciplinary perspectives covering areas including metals, ceramics, glasses, polymers, electrical materials ...
