Illusory superiority's relationship with self-esteem is uncertain. The theory that those with high self-esteem maintain this high level by rating themselves highly is not without merit—studies involving non-depressed college students found that they thought they had more control over positive outcomes compared to their peers, even when controlling for performance.

Maslow's hierarchy of needs is often portrayed in the shape of a pyramid with the largest, most fundamental needs at the bottom and the need for self-actualization and transcendence at the top. In other words, the crux of the theory is that individuals' most basic needs must be met before they become motivated to achieve higher level needs.
